

MEP1C, MEP2C, MEP3C & MEPTWOZONE PROGRAMMERS

Our programmers are single, dual and triple channel offering energy efficient control of your heating system.

MEP3C

MEP1c is a single channel programmer for use with combi boilers, as a domestic hot water control or with electric radiators when using a programmable thermostat for the central heating circuit.

MEP2c is a dual channel programmer for use with a central heating system and a domestic hot water control.

MEP3c is a three-channel programmer, designed for installations where there is a need for two heating zones and a hot water circuit.

MEPTWOZONE is a dual channel programmer for use within a central heating system to control two heating zones

General specification

GUARANTEE

2 year guarantee from date of purchase against manufacturing defects.

IP RATING

IP20.

DELIVERY

2 - 5 working days.

For more general information, please see page 260.

Product summary

- Easy to use
- Can be set for 24-hour, 5/2 day or 7-day operation
- Easy to read, backlit screen
- Pre-set clock
